

Design Document

Project Description:

This is a homepage of Najib Mosquera, a data analytics professional and computer science student learning web development, software engineering, and cloud AI skills. The site gives visitors a quick picture of Najib through a homepage, projects page, resume summary page, and one AI generated About Me page.

The homepage includes a centered profile photo, short introduction, contact links, and an original JavaScript feature called Today's Focus. The AI generated About Me page uses a darker, more advanced design so it clearly stands apart from the rest of the site.

The site is designed to meet the CS 5610 Project 1 requirements and rubric.

User Personas:

- Professor / Course Reviewer: John Alexis Guerra Gómez — Course Instructor
John is the professor for this web development course at Northeastern. Reviews the Project 1 submission and checks the rubric requirements, including multiple pages, W3C friendly HTML, Bootstrap usage, ES6 modules, original JavaScript, and file organization., and to check if we follow the rubric.
- Classmate Code Reviewer – Alex Ramirez
A classmate wants to quickly understand the website, review the code, and give feedback during code review.
- Recruiter: Amanda Conner
Finds the site through GitHub, LinkedIn, or a shared link and wants a quick overview of Najib's background, skills, projects, resume summary, contact links, and what he is doing at the moment.

User Stories:

Professor / Course Reviewer: John Alexis Guerra Gómez — Course Instructor

As a course instructor, I want to see a clear homepage, multiple pages, a working JavaScript feature, and an AI generated page, so that I can quickly verify that the project meets the CS 5610 rubric.

Classmate Code Reviewer:

Alex Ramirez, He want the website and code to be easy to follow, so that he can understand the page layout, navigation, and JavaScript feature during peer review.

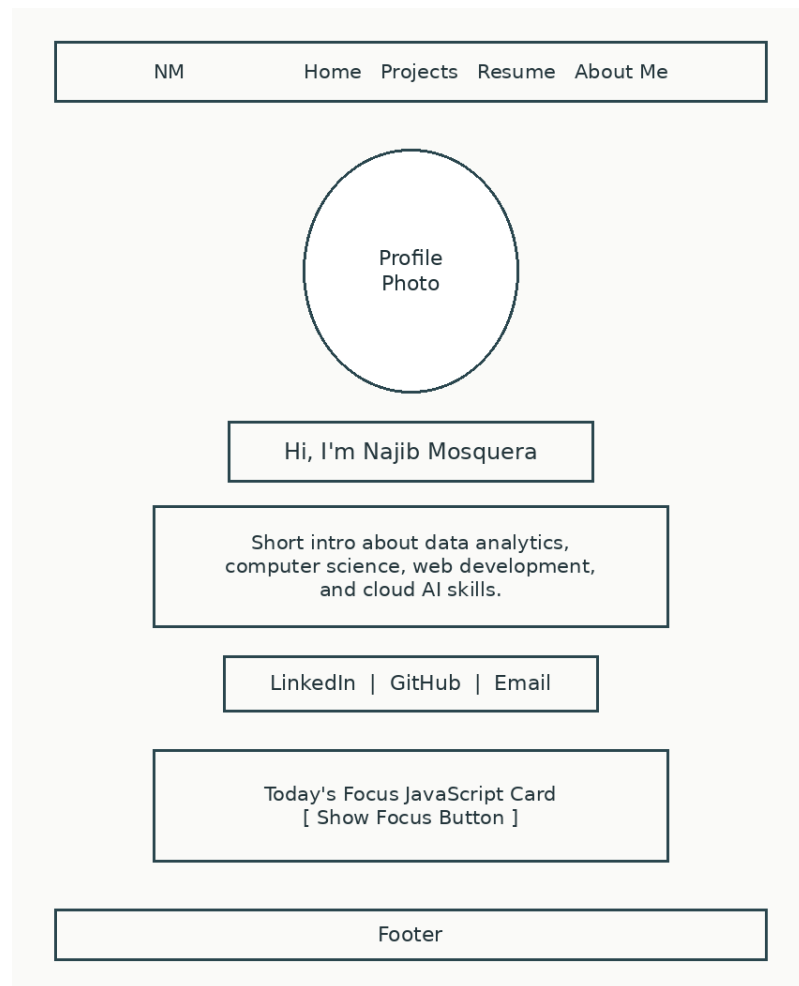

Recruiter - Amanda Conner

As a recruiter, She want to learn who Najib is, what he is studying, and what projects he is building, so that I can decide whether to connect with him.

Wireframes:

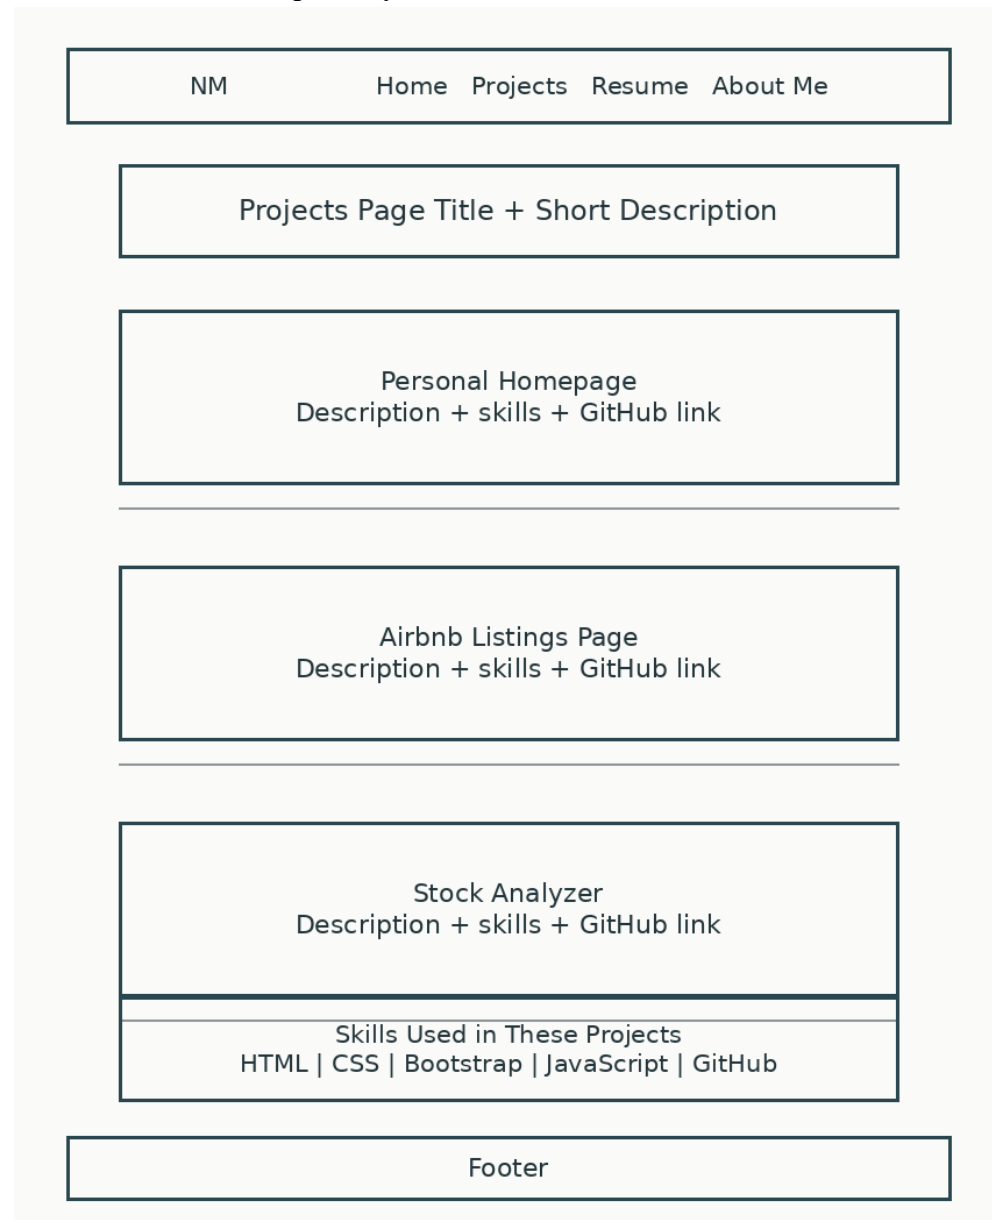

Home Page:

The home page uses a simple navigation bar, centered oval profile photo, short intro, contact links, and the Today's Focus JavaScript component.

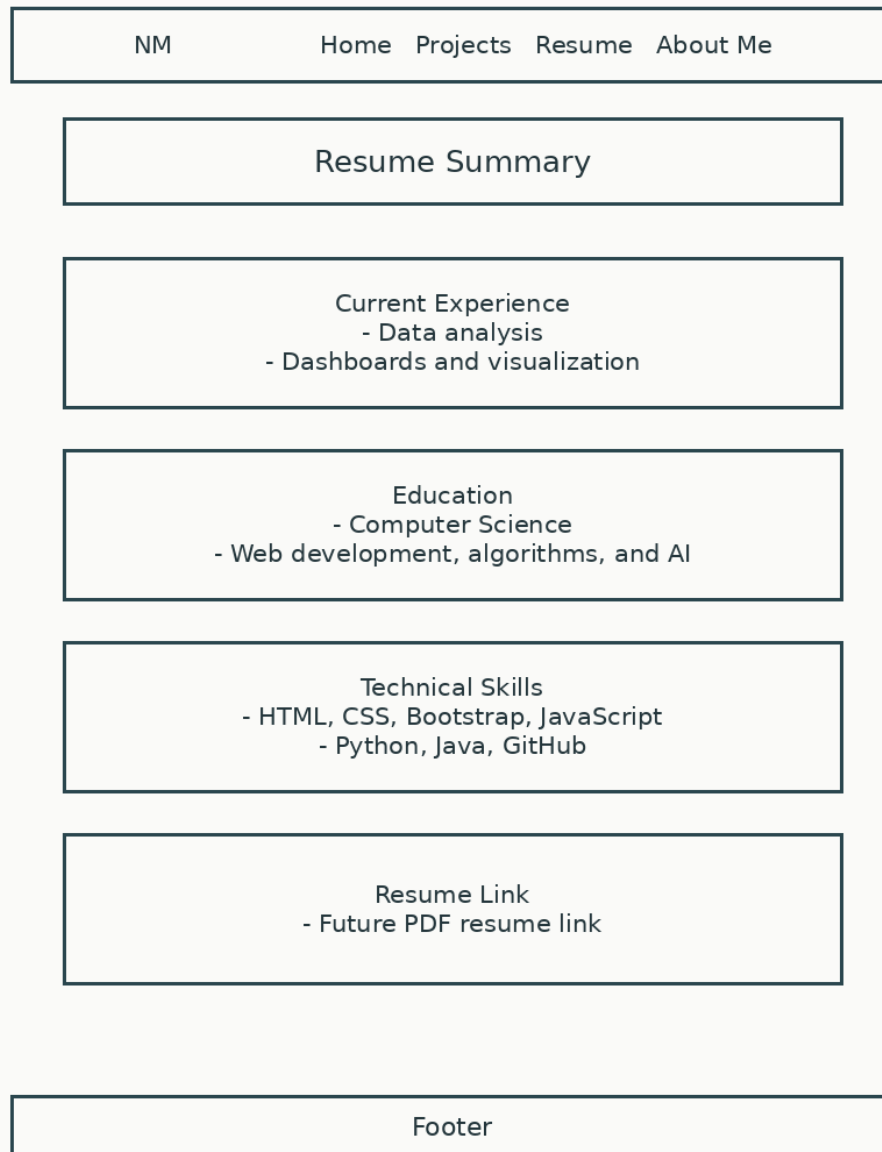

Projects Page:

The projects page is a resume style project list. Each project has a title, short description, skills used, and a GitHub repository link.

Resume Page:

The resume page gives a simple web version of Najib's resume, including experience, education, technical skills, and a future PDF resume link.

AI Generated About Me Page:

The About Me page looks very different from the rest of the website. It uses a dark gradient background, larger centered heading, and three AI generated content cards.
